DETAILED ACTION

Claims 1-11 are pending in the present application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method for detecting binding of a test substance to an $\alpha 2\delta$ subunit, classified in class 435, subclass 6.
- II. Claim 11, drawn to a method for identifying a test substance, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are distinct methods from each other having different starting material, different outcomes and different uses. According to MPEP 803.01 restriction is proper between patentably distinct inventions where the inventions are: (1) The inventions must be independent (see MPEP § 802.01, § 806.04, § 808.01) or distinct as claimed (see MPEP § 806.05 - § 806.05(i)); and (2) There must be a serious burden on the examiner if restriction is required (see MPEP § 803.02, § 806.04(a) - § 806.04(i), § 808.01(a), and § 808.02). The present inventions are capable of separate use as shown by their different method steps and different biological function. In the instant case, the different inventions each have different functions. The method of Group I is drawn to a method for detecting binding of a test substance while Group II recites a method for identifying a test substance. Group I and Group II each recite different method steps to achieve their purposes. Thus, the search for one is not coextensive with the search for the other. Moreover, the difference in function and method steps make each group separate and distinct from the other such that one is separately patentable from the other.

Art Unit: 1636

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Conclusion

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
